

Corporate, national and individual awarding
RESPONSIBLE TOWARDS WATER – WORLDWIDE COMPETITION

Water resources are natural and public good, lifeblood for all living beings, including a human, and a necessary medium for society. The water footprint becomes more and more important part of a successful economy and industry that is environmentally sustainable. Industries and companies are not only water consumers, or even less only pollutants with its waste water, but more and more a source and a hatchery of new environment technologies for water supply as well as water re-use and cleaning. Although the companies are very innovative and have good practices in the field of environment, this is often not enough exploited. The solutions that improve their attitude towards water resources, water environment and water use, are important part of a new industrial revolution in the times as water becomes the most important strategic raw material.

We seek new trends in a different understanding of water; water environments, different solutions that consider the entire water cycle and improve the quality of life in the future, and at the same time preserve the water environment. We would like to discover and award your innovative ideas in the field of water use and sustainable use of water resources, and consequently improve the water footprint, together with ministries of participating countries.

This year we will award the best water projects for the third time in a row (you can view the earlier awardees on our website). The goal of the awards is to create a consortium/pool from the mentioned categories that will present water-related solutions around the globe, and on the other hand to improve the quality of life, economy, etc. All the mentioned is connected to educational systems, ministries, economy, experts, etc. The entire water cycle with all the participants is considered. The applicants are gathered in our pool of projects, ideas and innovations, and in long-term we will connect them with suitable recipients of these projects and innovations. In following years, Bled Water Festival will become a one-stop water platform where everything connected with water will be happening. The pool has been building for 2 years now, and in 2019 it will be officially announced. Until then, please feel invited to join with your great ideas, projects and innovations.

Bled Water Festival has become the leading water platform in the field of finding innovations, creating new regulators and providing solutions. In long term, we will create the system for financing awarded projects. You are kindly invited to be part of the revolutionary project that changes our world for the better.

Conditions for applying

Who can apply:

1. Micro, small, medium and large sized enterprises from all around the world that provide services, products and solutions connected with improving the quality of water resources and reduced water use that also raise quality of life and consider the entire water cycle. Developmental solutions based on the inclusion of Green and Blue infrastructure. Please attach what you have achieved in recent years in the field of development, connected with water (minor water use, recycling, etc.)
2. National projects that include examples of good practice (living with water, industry, nature and people), developmental solutions based on the inclusion of Green and Blue infrastructure.
3. Individual projects (natural persons), associations, institutes (non-governmental organizations) that provide services, products and solutions connected with improving the quality of water resources and reduced water use that also raise quality of life and consider the entire water cycle. Developmental solutions based on the inclusion of Green and Blue infrastructure.

<http://bledwf.com/> - TENDERS

[Application fee: free of charge](#)

Conditions and instructions for cooperation:

- Participation is possible by everyone who has covered obligations towards their country and is not bankrupt
- The winners from past years cannot apply with the same project awarded by the Bled Water Festival
- In the case of incomplete application, you will be invited to complete it.
- In four days after the confirmation of your application, you will receive a confirmation e-mail stating that your application is received. With this confirmation, you are included in the competition part.
- On 1.6.2018 all participants will receive an e-mail with the shortlist of winners.
- We will choose three nominees from each category and invite them to Bled (8.6.2018 – Friday).
- The organizer does not cover any expenses related to the award receiving or similar.
- The nominees are obliged to come to the award ceremony or send someone to take the award on their behalf on 8.6.2018 in Bled (Slovenia).
- If the award shall be sent via post, the addressee (winner) covers the shipping costs.
- According to the previous agreement, the organization Bled Water Festival can enable a presentation of the products/services of all nominees at the location (free of charge). However, please consider that there are some spatial and fitting limitations due to which certain presentations cannot be realized.
- All winners are obliged to cooperate further with the Bled Water Festival platform at their best (the winners will be invited to round tables, lectures, solving problems with their solutions, etc.)
- After your application, the organizer has the right to publish all data, which can be found under »public announcement« in the application form.
- A video clip or photo material of your products/services is welcome (they can be delivered to our e-mail address or via wetransfer.com). All material will be publicly available.
- If the data, photo/video material is confidential, please state that the material is confidential; the organization Bled Water Festival will consider them as such.
- The organizer has the right to increase the number of the jury members if there will be more applicants than planned.
- If you state the size of your company incorrectly, you will be disqualified.
- If the finalists would like to attend the Bled Water Festival for 2 days, our organization can provide the all-access accreditation. In this case, please inform us until 1.6.2018 (24:00 CET).
